

ANDREW TRAN

UNDERGRADUATE AEROSPACE ENGINEER

727-900-4564 | andrewt675@outlook.com | <https://www.linkedin.com/in/andrew-tran-525a7a2b2/>

EDUCATION

University of Central Florida

Graduation: May 2029

Bachelor of Science in Aerospace Engineering

F-LEARN Research Scholar

LEADERSHIP EXPERIENCE & INVOLVEMENT

Current member of Knights Experimental Rocketry (KXR), Knights Satellite Club (KSC) and American Institute of Aeronautics and Astronautics (AIAA) at UCF; Undergraduate researcher of Knight3D (Faculty Mentor: Dr. Yun)

Fundraising Committee Chair | Knights Satellite Club (KSC)

May. 2026 – Present

- Currently serving as fundraising chair for KSC; helping raise more than \$1000 for projects and events through volunteering, outreach, and writing and proposing grants/bills to UCF Student Government and STEM-oriented organizations; in charge of budgeting and ordering supplies for the current TSAT-3A and TSAT-3B projects

Staff Member | UCF-GNU Space Camp – International Program

Dec. 2025 – Present

- Organized and helped plan a week-long program during the winter and summer involving 15+ international undergraduates studying aerospace from Gyeongsang National University, providing them an immersive experience of UCF and the greater Orlando area for what it offers for aerospace in both industry and technological advancement

RESEARCH & ENGINEERING PROJECTS

Undergraduate Researcher – Software/AI Side – Knight3D

Nov. 2025 – Present

- Utilized parametric modelling software, Rhino and Grasshopper, to design and produce houses and structures with given floor plans
- Integrated AI to assist with parametric modeling – the end goal is to be able to, with a given floor plan, enter prompts into the AI and it will be able to generate 3D structures given the same or different dimensions from the floor plan

L1 High Powered Rocketry – KXR

Sep. 2025 – April 2026

- Designed and assembled an L1 rocket under a 140\$ budget to reach 2200+ ft; used SolidWorks Simulations to simulate flight dynamics of the rocket

TSAT-2B (Tethered CubeSat) – Team Member – KSC

Sep. 2025 – March 2026

- Designed and assembled a CubeSat with an emphasis on avionics and software; focused on live telemetry (data such as temperature, altitude, velocity, and acceleration) as well as live video using OpenHD
- 3D modeled the frame of the CubeSat with SolidWorks, prototyping different parachute designs; assigned to work on risk mitigation and assessment such as checking weather, launch environment, and reviewing safety concerns
- Assisted in the launch of the CubeSat, which was tethered to a weather balloon and released up to 500 ft off the ground

TECHNICAL SKILLS

- Software: SolidWorks, Autodesk Fusion, Onshape, MATLAB, Rhino 3D/Grasshopper, OpenRocket, OpenHD, Excel, Word, PowerPoint, Free Flyer
- Coding Languages: Java, Python, C++, C
- Oral Languages: English, Vietnamese
- Skills: soldering, 3D modelling & simulations, data analysis, prompt engineering, technical documentation

CERTIFICATIONS

Microsoft Excel 2016 • Microsoft PowerPoint 2016 • Microsoft Word 2016 • Microsoft Office Specialist – OS Windows

Fundamentals (MICRO069) • Microsoft Technology Associate – Database Administration Fundamentals (MICRO076) • IC3

Spark • Certified SOLIDWORKS Associate (CSWA)
